PROJECTS

Personal Projects

Job Application Tracker — *Python, OOP, JSON, Standard Library, CLI*

- Engineered a 6-phase CLI app across 4 modules, tracking 13 fields through a 9-stage pipeline with full CRUD, 5-sort modes, keyword search, deadline alerts, CSV export, and a terminal analytics dashboard
- Architected an isolated data layer across 4 modules (db, models, ui, main) designed for planned MongoDB migration with no changes to business logic
- Leveraged Claude as an AI coding assistant throughout; critically reviewed 100% of generated code and guided architecture decisions across 9 commits

DayKeep - Daily Accountability Tracker — *Python, OOP, JSON, Standard Library, CLI*

- Built a 3-model CLI accountability system (Goals, Tasks, Journal) with streak tracking, stale task detection, notes stacking, and postpone history; planned migration to MongoDB and FastAPI backend

Neighborhood Game Night Website — *HTML, CSS, JavaScript, Bootstrap*

- Designed and architected a responsive multi-page web application for local gaming events, utilizing Bootstrap for mobile-first design and JavaScript for dynamic DOM manipulation and RSVP event handling.

Python CLI Suite — *Python, OOP, Tkinter, Turtle Graphics, REST APIs, Twilio*

- Built 15+ Python projects across CLI, GUI, and API paradigms using Tkinter, Requests, Twilio, and REST APIs including OpenWeatherMap, Alpha Vantage, and NewsAPI, demonstrating OOP, event-driven programming, and third-party API integration

EXPERIENCE
