

Dominion Eze

AI Engineer · System Architect · Cloud & DevOps Engineer

615-587-0596 | fortdominz10@gmail.com | linkedin.com/in/dominion-eze | github.com/fortdominz | dominioneze.dev

EDUCATION

Fisk University

Nashville, TN

Bachelor of Science in Computer Science

Dec. 2028 | GPA: 4.0

- Relevant Coursework: Intro to CS I & II (Python, Java), Data Structures, Calculus I & II
- Extracurriculars: African Students Association (ASA), Computer Science Club, ColorStack
- Programs/Fellowships: EY, CodePath, Oracle, Propel2excel

TECHNICAL SKILLS

Languages & Scripting: Python, Java, JavaScript, Bash, HTML, CSS, SQL

Frameworks & Libraries: React, FastAPI, Vite, Node.js, Django, Bootstrap, MongoDB, Git

Cloud, DevOps & Infra: Linux, AWS, Docker, Kubernetes, Terraform, Ansible, Jenkins, GitHub Actions, GitLab CI/CD, Helm, GCP, Prometheus, Grafana, Loki

AI Tools & Agents: Gemini AI, Claude Code, GitHub Copilot, Amazon Q

EXPERIENCE

Remote Extern

July 2025 – Aug. 2025

Extern x Emboldly

Remote

- Consulted for a social impact startup aiming to provide **1.5M** women of color and non-binary individuals leadership access; identified and qualified **5** high-value donor organizations through mission-alignment research
- Developed a “Partnership Playbook” featuring tailored outreach strategies and engagement roadmaps, presenting final strategic recommendations to executive leadership using professional consulting frameworks

Mathematics Teaching Assistant & Competition Lead

Apr. 2016 – Sep. 2021

Oshboug Modern Secondary School

Lagos, Nigeria

- Broke down complex mathematical concepts for students over 5 years, directly transferable to algorithm design, debugging, and technical communication
- Led a team of 3 to win a school-wide mathematics competition, contributing over **70%+** of the total score

Protocol Officer, Jets Club

May 2018 – Aug. 2018

Oshboug Modern Secondary School

Lagos, Nigeria

- Organized meetings and documented projects for **30+** members, including building light bulbs, extension boxes, and mini fans, fostering collaboration and innovation in STEM activities

PROJECTS

Personal Projects

GateKeep — **Facial Recognition Security System** | Python, FastAPI, React, Vite, InsightFace, SQLite

- Built a real-time **computer vision** security dashboard; applied InsightFace-powered face detection and **cosine similarity** matching against an enrolled watchlist over a live MJPEG camera stream; React SOC-style interface includes live feed, alert logging, enrollment, and banned-persons management

MusicTasteMatchAI v3.0 | Python, FastAPI, React, Vite, Gemini AI, Spotify Web API

- Built a **6-stage AI pipeline** (natural language → preference profile → live Spotify search → scoring → **bias detection** → AI critique) with a bias confidence scorer (0.0–1.0); deployed full-stack at musictastematchai.dominioneze.dev

DayKeep v2.0 — **Daily Accountability Tracker** | Python, FastAPI, React, Vite

- Converted a 3-model CLI system (Goals, Tasks, Journal) to a **full-stack** web app with a FastAPI backend, React + Vite frontend, streak tracking, mood logging, and a real-time dashboard; live at daykeep.dominioneze.dev

Job Application Tracker | Python, OOP, JSON, CLI

- Engineered a modular CLI app across 4 independent modules (db, models, ui, main) with a **9-stage** application pipeline, keyword search, deadline alerts, CSV export, and a terminal analytics dashboard; data layer architected for **MongoDB migration** with no changes to business logic

Developer Portfolio — dominioneze.dev | React, Vite, CSS

- Built a personal developer portfolio with a full design system using CSS custom properties (no framework); all projects link to live apps deployed at custom subdomains on Vercel
